Q1) $w_1 x_1 + w_2 x_2 + b = \text{Weighted Sum}$

$$= 0.9 \times 0.1 + 0.4 \times 0.6 + 0.2$$

$$= 0.09 + 0.24 + 0.2$$

$$= 0.33 + 0.2 = 0.530$$

Q2) $f(z) = \frac{1}{1 + e^{-z}} \Rightarrow z = 1.2$

$$= \frac{1}{1 + e^{-1.2}} = 0.7685$$
